

iPack Rx Unit Dose Packaging System Achieves CE Certification, Enhancing Medication Safety and Efficiency

ALEXANDRIA, La. - ([NewMediaWire](#)) - December 9, 2024 - Pearson Medical Technologies, LLC is proud to announce that its innovative iPack® Rx Unit Dose Packaging System is now **CE, CE/UK certified**, marking a significant milestone in the company's commitment to improving patient safety through **precise unit dose packaging and bar code labeling of medication**.

The iPack® Rx Unit Dose Packaging System streamlines the packaging and labeling of medications, ensuring healthcare providers can deliver the **correct** dose to the **correct** patient at the **correct** time. This **state-of-the-art tabletop packager** minimizes the risk of medication errors, enhances regulatory compliance, and supports efficient pharmacy operations.

CE certification signifies that the iPack® Rx Unit Dose Packaging System meets stringent European health, safety, and environmental protection standards. This achievement not only underscores the system's quality and reliability but also reinforces Pearson Medical's dedication to advancing healthcare technology through **innovative solutions**.

"We are thrilled to announce the CE/UK certification of our iPack® Rx Unit Dose Packaging System," said W. Brent Pearson, CEO of Pearson Medical Technologies, LLC. "This achievement reflects our relentless pursuit of excellence and our commitment to enhancing patient care. We believe this system will significantly improve the accuracy of medication identification and administration in healthcare facilities across Europe and the UK."

The iPack® Rx Unit Dose Packaging System is designed with **user-friendly features**, including our intuitive software, m:Print® Bar Code Labeling Software, customizable packaging options, and real-time tracking capabilities. These advancements empower pharmacies to **optimize Rules-Based Workflow**, ultimately improving patient outcomes.

With CE certification, Pearson Medical Technologies, LLC is now poised to expand its presence in European and British markets, offering innovative and compliant solutions to healthcare providers seeking to enhance their medication packaging and labeling practices.
